NO TOUCH PUNCH™

Reduce Exposure and Stay Safe

Time Terminal is an application which works on your iPad or iPhone. On-the-go employees can clock in remotely and managers can use features to manage their staff.

No Touch Punch™ means reducing you employee's exposure to another high-traffic surface area.

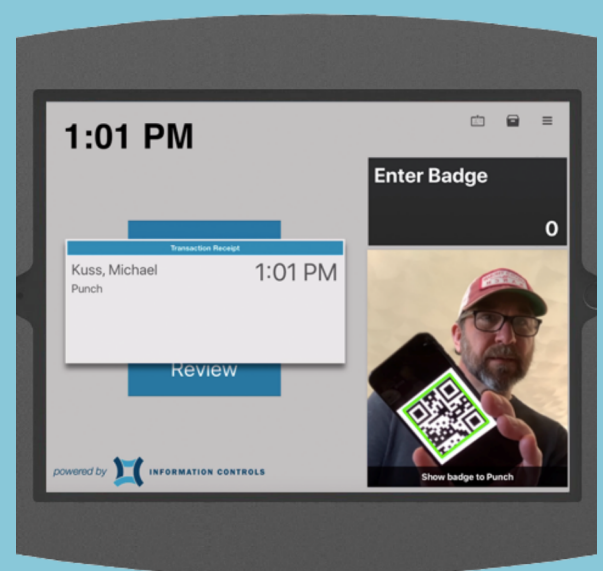

It is more important than ever to keep your employees healthy. Our new No Touch Punch feature enables an employee to present a QR code or barcode; eliminating the need to touch the device.

Employees can clock in and out by using a standard badge, label, or by using a QR code image from their smart phones!

EMPLOYEES CAN CLOCK IN AND OUT BY USING A STANDARD BADGE OR LABEL, OR BY USING A QR CODE IMAGE FROM THEIR SMART PHONES!

- Create and send employees a QR code.
- Employees display the code on their phone to clock in and out, without touching the iPad (Devices are typically wall mounted).
- Time Terminal captures the punch in real-time and connects with Attendance on Demand.
- If an Internet connection becomes unavailable, punches remain stored in the device until the connection resumes.
- Add COVID-19 Exposure Question with Punch In

Click <u>HERE</u> to contact us about getting No Touch Punch™ for your business or for more information go to <u>timeequipment.com</u>.
